

# PRESA PR1

Utilizing the latest pattern and compound technology, the engineers focused on maximizing safety performance to give you the ultimate peace of mind. Breakthrough construction, pattern and compound design provides great refinement while maintaining excellent mileage performance.

## Multi-Pitch Tread Design

Reduces perceived pattern noise and overall noise resonance.

## Closed Shoulder Design

Minimizes pipe resonance for minimized pattern noise and improved driving refinement.

## Balanced Sipe Design

Optimizes tread stiffness for improved ride comfort.

## Unique Tread Compound

Improves braking performance in the dry and the wet which reduces overall braking distance for maximum driving safety. Reduces rolling resistance and maximizes mileage.

## Circumferential Groove Design

New circumferential groove design improves water dispersion for excellent hydroplaning resistance and wet weather performance.

# NEW

## PR1 SPECIFICATIONS

Part Number	Size	Service Description	Sidewall	Overall Diameter (in.)	Section Width (in.)	Max Infl. Pressure (psi)	Max Load (lbs)	Approved Rim Width (in.)	Tread Depth (in.)
